

# Micrometer Calibration Ruler

20mm in 0.01mm divisions.

Quality of Inspection

Calibration ruler with 20mm length scale subdivided into 0.01mm divisions, engraved serial number in stainless steel slide mount. For high-accuracy calibration of magnifications in INSPECTIS software.

The scale is produced as a vacuum deposited chrome image on a glass disc, with a cover-glass cemented on top. This is mounted in a stainless-steel slide mount and is supplied in a polished wooden case. Internationally traceable certificates of calibration are available to satisfy the requirements of ISO.

## Specification:

Design	Chrome image printed on glass in stainless steel slide mount
Scale length	20 mm
Division	0.01mm
Line width	0.002mm
Accuracy (overall)	<0.001mm

## Ordering Number/Name

- HD-053 Micrometer Calibration Ruler. 20mm in 0.01mm divisions. Engraved serial number.
- HD-054 Micrometer Calibration Ruler. 20mm in 0.01mm divisions. Engraved serial number. With Certificate of Calibration.
